About Us

One of the most luxurious hotels on the east coast of Zanzibar, Karafuu Beach Resort & Spa has been granted an international five-star rating.

Situated on the east coast, 65 km away from Stone Town and the airport, its ideal location is just what you're after: a blissful stretch of palm-fringed beach with white sand, and dazzling blue water.

The spacious, cool reception area under Makuti (palm-thatched roof) is impressive, especially when you're visiting the resort for the first time.

There is an enormous pool around which you will find guests soaking up the sun. The clientele is largely international, so you will hear a variety of accents.

A little further along is the beach with a generous strip of sand with sun lounges set a good distance apart from each other.

Warm hospitality comes naturally to the Swahili staff, who are impeccably dressed in long, robed uniforms. You are welcomed with the traditional greeting of karibu and there is always someone available to assist with a smile.

The hotel has all the expected facilities: a fully-equipped Diving center, boutiques, tennis courts, a gymnasium and a Spa. The rooms are extremely comfortable and styled in a modern Zanzibar theme. They provide a welcome relief from the sun when you have spent the day by the pool, diving and on the beach.

The eastern side of the island is greatly influenced by the tide. You can sunbathe on the beach and slip straight into the water and swim far out when the tide is high. When the tide recedes, you have to wade out to the fringing reef, and look for marine life in the shallows.

Karafuu is one of the few hotels on the east coast where you can enjoy a comfortable and safe swim in the ocean at low tide.

A concrete path in front of the hotel leads you from the beach to a permanent natural depression in the ocean bed just 200 meters offshore, offering a giant natural swimming pool deep enough for small boats to moor in.

The hotel, opened in 1995, is aptly named after the Swahili word for cloves, karafuu, which grows in abundance in Zanzibar (especially in Pemba)
